In Kenya, malnutrition is a major driver of poverty and inequality. It is attributed to 53% all deaths of children under five\(^1\).

Across FLW cadres many professionals require strengthened competency, knowledge and skills to deliver quality nutrition services. Existing efforts towards improving nutrition education and practice are not harmonised between cadres and across different counties.

---

**THE DEVELOPMENT PROCESS**

- Consultative design and development
- Successful conclusion of pilot trials
- Deployment ready across counties

**THE TRAINING EXPERIENCE**

- Facility and community-based FLW packages
- Five day intensive course - four in-class, one practical
- Delivery at local health facilities or community settings

---

**TAKE THIS OPPORTUNITY TO:**

**INCREASE**
coverage statistics in your county

**MOTIVATE**
and skill the FLW workforce

**IMPROVE**
nutrition, health and poverty outcomes
